

17 Years and still going strong! Built in 1992, the Royal Alexandra Hospital Atrium in Edmonton, Alberta, Canada, consists of insulating glass units made with 43,500 feet of silicone Super Spacer® (photo taken in 2008). The 2009 Hospital Expansion project was also specified and built with the Super Spacer family of products.

Insulating glass edged with the Super Spacer family of products satisfies the toughest demands:

- Specify TriSeal for your next commercial LEED® project.
- Reduces energy consumption up to 15% in curtain wall glazing systems.
- Dramatically reduces seal failure and stress crack callbacks.
- Passes the toughest industry tests (ASTM 2190; EN 1279).
- ASTM E330 120* psf positive, 155* psf negative
*no failure; maximum limitations of testing equipment.
- Improves U-Value by up to 12 percent.
- Noise reduction by up to 2 dB.
- Significantly improves production efficiency.
